

Stuff That Works™ For Less Than You Thought!

You don't have to lose out on Iftron's legendary video quality by buying inferior video equipment when you can have brilliant, sharp video **for less than you thought possible!**

Iftron's new **Nano Modular Wireless Video** System brings you the cleanest video in the industry at a very **affordable** price! Then when you are ready, you can **upgrade your initial investment** to full Iftron diversity performance with Iftron's new **Nano Diversity Docking Module** and a second Nano. Just plug two Nano's in and go!

To add to the excitement, you can choose either our **2.4GHz or 5.8GHz** Nano as suits your needs. Our Nano Diversity Docking Module **works with either one!**

If your choice is 5.8GHz, Iftron offers two new 5.8GHz transmitters: our **Stinger Nano 5.8** with **100mw** of solid output **power**, and our **potent new 250mw Stinger Pro 5.8** featuring dual audio channels, built in microphone amplifier and exclusive LiPo **battery saver**.

Either way, you'll get super-clear video and Iftron's exclusive onboard switching power supply technology that **reduces battery size and weight** while minimizing waste heat. All this and the most **acclaimed video quality** available in an airborne transmitter.

To learn **more about Nano** and to see the full line of **Iftron's leading edge** video equipment, visit an Iftron certified video **dealer** now **Iftron Tech Dealer List** or visit **www.ifrontech.com** for more information.
